WHY MIMS?

Quality

One of the biggest reasons why you should choose us is because we at MIMS builders never compromise on quality. It is our top priority. Due to our focus on quality, all our projects are way above expected standards. And how do we achieve this? Each one of our projects is handled by a management team led by a project executive. From pre-construction stage to the final stage, they oversee the project responsibly and with complete devotion. An awareness of on-site progress, administration, cost-control and communication between the client and architect are considered critical to a successful project. And these important aspects of business are never overlooked by us.

We ensure that even the tiniest details are attended to and our customers get home that offers them nothing but the best. Knowledge, focus and quality help us to run a well-rounded and managed business.

Value

Our home buyers always get value from us. Be it on the quality of homes provided or in terms of assistance provided by our sales representatives who are extremely knowledgeable and well-informed. Affordable standard features are a part of our homes. We provide better designs, well-thought of amenities and meticulously planned luxuries and comforts. A high quality neighbourhood is also a part of the whole package.

Years of expertise goes into making homes of highest standards that is a dream come true for our homebuyers. Our reputation guarantees that your home will be delivered as promised. And from the building stage to completion stage to sales and then to after sales, we promise to deliver excellent value.

Eco-friendly

We are also aware that most of our home-buyers are nature conscious and want to reduce their carbon footprint. Like minded, we also believe in preserving the eco-system. So, what MIMS builders does is take few easy-to-implement steps towards a greener future. Each project of ours has water recycling plants and rainwater harvesting facilities. Not only do we try our best to retain the original landscape in every area, but also plant more trees. A green surrounding helps preserve the nature adds a scenic beauty to our homes. And most importantly conserving energy and water will only help increase the durability of these homes.

The Mysore Horticultural Society Lalbagh, Bangalore has awarded us a special prize and we have also received outstanding prize for the “Best ornamental design during horticultural show 2006-07”. This just inspires us to be more eco-friendly.

Integrity

What other builders claim, we actually deliver. Superior reputation, premier locations, commitment to quality, go green attitude and dedication to homeowners makes us the first choice of home buyers. Our ten years of experience and the trust our customers have in us shows the integrity we possess. We build a home that our homebuyers have envisioned. And they truly appreciate the quality, value and sophistication of the homes we provide. This is proven by the fact that more than half our sales happen through word-of-mouth and not by media advertising. It’s a community built on friendship. We deliver what we promise, and that is why our customers place faith in us and value our integrity.
